Understand your cybersecurity risks. Secure your systems. Protect your business.

### Are you keeping pace with change?
Security is one of the most complex areas of the information technology landscape — and a critical concern for companies in every industry.

- How well do you understand the threat landscape and your vulnerabilities?
- Do you have adequate security tools and processes in place?
- Does your IT team have sufficient resources to keep up with rapidly evolving security considerations?

Most organizations simply don't have the internal resources and skills to mount an effective defense.

SERVICE DESK MANAGEMENT

A different approach
Many managed services providers just oversee established security tools. We help you manage your threat landscape. That's a big difference in approach that can make a big difference in your operations. Ascend is dedicated to securing your systems and processes with high quality and efficiency. Our technical and business expertise makes us an ideal partner for security functions that demand flawless execution:

Endpoint Protection	Managed Detection & Response	Vulnerability Management	Security Operation Management	Security Awareness & Phishing Program	Virtual Chief Information Security Officer (vCISO)
Day-to-day support and maintenance of advanced threats through ransomware protection, exploit prevention and malicious traffic detection	24x7 Security Operations Monitoring services for endpoint detections, log management, and incident response	Vulnerability scans of your environment for known exploits with actionable reporting and advice to remediate	Daily support and maintenance tasks required to operate your security infrastructure (e.g. IPS management)	Ongoing phishing campaigns and annual cybersecurity training program	Risk management leadership along with ongoing management of security program and compliance activities
